

WHAT MAKES NOON PRODUCTS SO UNIQUE?

Breakthrough DermShield™ technology, which is the core of NOON™ Aesthetics products, enables safe and highly effective skincare treatments. DermShield™ uses a novel protective complex which allows the use of **high concentration active ingredients**, treating the skin problem at its source **with no irritation or redness**.

DERMSHIELD™ ADVANTAGES

- Significantly reduces tingling, burning and itching sensations
- Suppresses inflammation, swelling, and redness
- Provides highly effective treatments that are pleasant & soothing
- Allows much shorter recovery time after in-clinic peels

"The addition of the novel protective complex (DermShield™) to highly concentrated skincare is a highly effective, safe modality in the reduction of erythema, pain, and itching after peel application, and it provides an advantage in the post-treatment healing period."*

Ofir Artzi, M. D., Lee Heyman, M. D., Rafael, L., & Joseph, N. (2021). The efficacy and safety of a novel protective complex combined with 50% glycolic acid peel: a double-blinded, split face, controlled study.

HIGH CONCENTRATION WITHOUT IRRITATION BRINGS THE BEST RESULTS

PIGMENTATION

SEBORRHEA

ACNE

ANTI-AGING

"I am so impressed with the NOON Aesthetics line. My skin looks amazing and it has only been 3 days. The redness has gone down and my skin feels smooth after using the products. Couldn't be happier!"

- L.J. Boston, MA

- Rosacea
- Fine Lines & Wrinkles
- Loss of Firmness & Elasticity
- Seborrhea

NOON Aesthetics' game changing approach enables a new standard to skincare products delivering highly effective & safe treatments for all skin conditions, all skin types, all genders, all ages, all year round.

GAME CHANGING SKINCARE SOLUTIONS

HOW DO I KNOW WHAT PRODUCTS TO USE?

NOON's skincare professionals are certified to identify the best treatment protocol for your specific needs, based on an in-depth personalized skin analysis.

WHAT IS A TYPICAL TREATMENT REGIME?

Your NOON treatment protocol will consist of professional in-clinic treatments combined with a home care regime which should be followed as per the instructions given by your skincare provider.

WHEN CAN I EXPECT TO SEE RESULTS?

Results are individual and may vary, but you can expect to see improvement within one week of using NOON's products. For optimal results, follow your personalized day & night regimes as instructed by your skincare provider.

WHY DOES CONCENTRATION OF ACTIVE INGREDIENTS MATTER?

A higher concentration of active ingredients increases the effectiveness of your skincare products, leading to more dramatic results over a shorter period of time. When you maximize the potency and concentration of skincare, this typically means a higher risk of side effects such as redness and irritation. This is why other companies reduce their concentrations, resulting in a much less effective treatment. NOON's proprietary DermShield™ technology protects your skin from redness and irritation, allowing you to benefit from the highest concentration of active ingredients without side effects.
